Featuring: **HEIL DuraPack Python – High Compaction Automated Side Loader**

Joystick Cab Controls: reliable, ergonomic joystick controls deliver smoother performance and enhance usability. With the standard AutoLoad system, the operator can reach, grab, lift, dump, and return the arm to the stowed position using only the joystick and 2 buttons.

DuraMount Design: This design is used to mount the lift to the chassis frame, reduces the potential for bolt fatigue and provides Service Smart bolt access for easy maintenance.

Python Automated Lift: The Python's 9-foot reach can slither between cars and other obstacles, making even the most difficult pick-ups possible.

Python Grabber Gears: Made from specially formulated high-strength alloy steel, the Python's superior hardened grabber gears virtually eliminate gear wear. The gears are splined to the grabber shafts and can be cycled up to 10,000,000 times with no evidence of wear.

Tough Gate: The Tailgate is reinforced to prevent buckling and features a 60-inch seal to keep liquids inside the body where they belong.

The DuraPack Python automated side loader combines two proven products in one high-performance package – the DuraPack body, which is famous for its toughness and productivity, and the patented Python automated arm, which is faster, smoother, and longer lasting than any other.

The DuraPack Python's Arm has an 8-second lift cycle. That can save you up to 4 seconds per stop – and up to 1 hour per day. You don't have to wait for the hopper to catch up with a load, either, because the Python's follower panel enables continuous dumping. Twin packing cylinders deliver outstanding payloads, so can collect more homes with fewer trips to the disposal site.

Able to lift up to 800 pounds, the Python's Arm features cushioned cylinders for action that's as smooth as a snake, saving wear and tear on the lift arm and the chassis. The Python's unique lift geometry also prevents spillage and enables the arm to return carts with the lids closed every time.

Our Locations: 1368 Lonedell Road, Arnold, Missouri 63010 / 450 N. Lindenwood Drive, Olathe, Kansas 66062

Spring Dates in 2022 for the TYMCO Service School

<u>May:</u>	10 - 11	Model 600
	17 - 18	Model 600
	24 - 25	Model 500x
<u>June:</u>	7 - 8	Model 210/435
	21 - 22	Model 600

Located in Waco TX, the 3500 square foot, temperature controlled TYMCO Training Center provides space for demonstrations on operational sweeper and systems components.

Please contact TYMCO directly through their Training Form at Tymco.com, or call 800-258-9626 directly.

Is it time to look for a New Street Sweeper for your organization?

Spring Clean-Up Time is Here!

The **TYMCO DST-4 Regenerative Air Sweeper** cleans deeper, and allows for year around sweeping, including freezing conditions, and clean-up after winter sanding operations.

The **DST-4** is perfect for applications such as Coal, Fly Ash, Cement, Lime, Grain and Other Dusty Materials that may require sweeping **WITHOUT** using Water for Dust Control.

Sweeping Construction Sites, Industrial Facilities, Aggregate Facilities & Quarries, and Cement & Asphalt Facilities is where the **DST-4 Sweeper** excels!
