Sales, Service and Parts for STREET SWEEPERS

St. Louis (636) 296-7119

Kansas (913) 839-1777

Featuring: *Tymco's Model 500X Sweeper*

Whether you're sweeping city streets or sweeping behind a milling machine (or a road reclaimer), any successful sweeping program needs a reliable sweeper. The **Model 500x** is built using the high-efficiency, time-tested **TYMCO Regenerative Air System** that delivers solid reliability and clean sweep.

Let us share why the Model 500x could be the sweeper for you!

The Model 500x Perks:

Heavy duty hopper, screens and high capacity dust separator is constructed of non-magnetic stainless steel. The hopper is designed with openings for cleaning above the screens without the use of drop-down screens or access panels. Large hopper door allows easy dumping and is locked for both an air and watertight seal. Hopper Drain System allows for draining water picked up while sweeping. Sweeper Deluge System allows for the attachment of a high-volume hose to aid in cleaning both the hopper and pick-up head.

And more: Heavy duty scissor lift assembly has a 10,000lb lift capacity. All pivots on the lift are self-lubricating and never require greasing. Integral counterbalance holding valves deliver controlled lowering of the lift assembly and serve as redundant safety locks. Tilt-N-Seal Blower System utilizes an adjustable spring balance design – ensures long seal life between the hopper and blower housing. Powerful, fuel efficient 115HP Diesel Auxiliary Engine meets Final Tier 4 (FT4) US EPA emissions standards. 5.7 Cu Yd Hopper offers a variable dump height from 2ft to 11ft, which allows for dumping into various size and type containers.

And some more: The Stainless Steel Dump Chute projects debris into the middle of the container without the need of a side shift. The dump chute is separate from the hopper door which minimizes potential damage to the door and ensures a good seal. The chute is designed to float 45 degrees upward, preventing major damage should it meet the debris container.

Gutter Brooms are patented dual 43" vertical digger with variable speed and tilting. Also, they are illuminated for night sweeping.

In-Cab Controls are center mounted and illuminated for ease of operation.

**Two (2) super convenient
Armor locations:**

1368 Lonedell Rd, Arnold MO &
450 N. Lindenwood Dr, Olathe KS

Our Sales Department has a 2020 TYMCO 600BAH DEMO Unit!

Replacement parts needed?
Robert's the guy!

Our Armor locations will be Closed on Monday, Sept 7th (for Labor Day)

Our Armor Calendars are in production – Stay Tuned... They'll be hitting the streets soon! *Super Exciting!*

We are Celebrating our 50th Anniversary this Year!

Armor Equipment's story started with a small engine repair shop in the early 1970's called **Anchor**. In the mid-1980's the company moved across the street (literally!) and had a name change to **Armor Equipment**. With this move, along came the addition of a much larger SERVICE Department, and a fully stocked PARTS Department. A knowledgeable SALES Staff was added, and *BAM*.....the truck selling began!

In early 2004, **Armor** changed hands to the present owners, and **Armor** continued to offer full product lines for Refuse, Streets Sweepers and Roll-off Trucks, along with Carts & Containers, Trailers, Axles, Tarps and Truck Suspensions.

In December 2016, **Armor** listened to the needs of its customers and the industry and opened a 2nd location in Olathe Kansas.

The *Armor journey* has had its bumps (as most stories do), but we are still standing strong in our industry, and we pride ourselves in continuing to cater to our customers (old and new!).

50 Years Young & Still Standing Strong!
