Inventory!

MISSOURI / ILLINOIS (636) 296-7119 KANSAS (913) 839-1777

Featuring: **Tymco Model 500x**[®]

The *Tymco 500x* has the most advanced high dumping hopper lift assembly available today.

The *500x* is built using the high-efficiency, time-tested

**Regenerative Air System* that delivers rock-solid reliability and an amazingly clean sweep. With a fast dump cycle of less than 68 seconds and a soaring 11ft dump height, the *500x* provides extreme versatility.

500x Features:

- **Broom Assist Pick-Up Head:** incorporates full-width air blast and suction to pick up street debris.
- **Hopper and Chute:** hopper capacity is over 5.7 cu yds and ensures owners payload of over 6,000lbs. The stainless steel chute provides discharge of debris w/o the need of a hopper side shift.
- **Hopper Lift Assembly:** has a 10,000lb lift capacity. All pivots on the lift are self-lubricating and never require greasing.
- **Gutter Broom:** 43" diameter gutter brooms remove debris from curbs, gutters, and along city streets.
- **Dust Control:** high-efficiency centrifugal dust separator.
- **Power Unit:** powered by an 115HP John Deere aux engine.

New StL Employee

London Lowe / Parts Dept / Herky Graduate / Our Next Gen

Our London...like 8 years ago... (Ummm...no words)

We currently have a *Tymco 500x* Street Sweeper onsite and Available for Demonstration! **Woohoo!**

**A Tymco Regenerative Air Sweeper* uses a controlled blast of air to dislodge debris from the surface. All debris picked up by the pick-up head is directed up the large diameter heavy duty suction hose into the hopper. *Tymco* removes trash and dirt from the entire area beneath the full-width pick-up head. *Regenerative Air* means a *Tymco* never exhausts polluted air into the atmosphere like a vacuum sweeper.

Bayne's Actuated Lifters -These Lifters, also known as **Cart Tippers**, are specifically designed to improve the efficiency of your refuse collection operating and minimize your fleet downtime.

Recently, the [City of Washington in Missouri](https://www.cityofwashington.com) offered a testimonial for the Bayne Premium Lift System – check out this live video! <https://vimeo.com/330918490>

These mobile refuse applications feature the patented Thinline® rack and pinion rotary actuator for superior lifting capacity and outstanding reliability.

From this

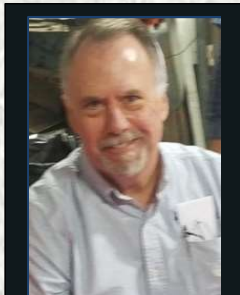

TO THIS!

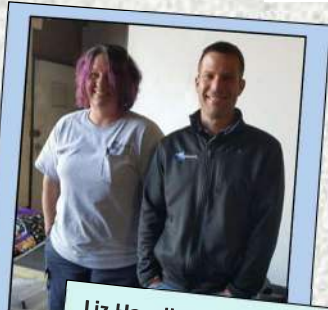

All of these quality built Bayne mobile refuse lifters offer:

- Designed to work in conjunction with most commercial container lift bars
 - Have a 22" of ground clearance
 - * Safe and efficient cycle times
- Patented Thinline rack and pinion rotary actuators or welded cylinders
 - Self-lubricating composite bearings for low maintenance

Armor's Bulletin Board:

Dennis Callanan
(Sales Manager)
is celebrating a

He said, "Will you?",
and she said, "Yes!"

Congratulations are in
order for **Mark Harless**,
our Region Sales Mgr.

HELP WANTED:

We are looking for an **Experienced Truck Parts Counter Person** in our **KS location**. If you would like to be part of our Armor family – please email us at Tripp@armor-equip.com.

YEARS OF SERVICE IN OUR SERVICE DEPT

Don Chronister is Celebrating a "Years of Service"
Anniversary! **Don has been devoted to Armor**
Equipment for a total of 16 years!

Don is the Shop Foreman for our Armor St. Louis location. Don started working in our Service Department as a diesel mechanic, when Armor was located "across the street". **Don quickly moved into the foreman position** after demonstrating his skill level and experience working on heavy duty trucks and equipment. Also, with his all-encompassing leadership abilities, Don has earned the respect of our customers, and his fellow employees.

We are not sure how he does it, but Don continues to bring humor, hard work and leadership into our St. Louis Service Department and for that, we are truly grateful.
