**Featuring: Sewer Easement Machines**

JAJ-600WH Easement Machine (Tread Drive)

**Are certain sewer pipes in your community neglected due to hard-to-reach manholes?**

Do your maintenance crews have to manually drag hoses across easements or cause damage to yards, golf courses, or sensitive areas when trying to service these remote lines? **If so, the Sewer Equipment Easement Unit will be an invaluable asset to your fleet!**

The JAJ-600 WH is driven by a Honda V-twin engine on a hydrostatically powered tread drive platform. This simple design eliminates drive chains and sprockets and provides clean and quiet operation. Obstacles that leave wheel drive units spinning, such as small logs, rocks, creeks, hills, curbs, stairs, sand, mud, and snow, are all easily traversed by the JAJ's tread drive system while pulling your jet hose to the manhole. **While offering tremendous traction**, rubber tracks distribute weight evenly and limit ground pressure to only 4lbs per square inch; the same standard applied to golf course maint equip.

Dimensions:

- ✚ Length: 7'2"
- ✚ Width: 2'10"
- ✚ Height: 5'5"
- ✚ Min HP: 24hp
- ✚ Hydraulic Requirements: 10gpm @2000psi
- ✚ Max Hose Capacity: 1" x 600'
- ✚ Track Weight Distribution: 3.4 Per Square Inch

## Several of our Drivers, Jim Rayman & Mike Rayman, are STILL Celebrating Armor's 50<sup>th</sup> Anniversary!

THANK YOU for your continued hard work fellas!

And, because you may be wondering... No, they are not twins (but, they are brothers). And apparently Mike is the good-looking brother!
