Parts for  
**STREET SWEEPERS**

ST. LOUIS (636) 296-7119 STL TOLL FREE (800) 777-2766 KANSAS (913) 839-1777

Featuring: *Tymco's Model 210 Parking Lot Sweeper.....*

**The TYMCO Model 210® is the parking lot sweeper** with both power and maneuverability that you need to get the job done. With a height clearance as low as 6'6" and a large 2.4 cubic yard hopper, the Model 210 is ideal for tackling a downtown parking garage or the largest of parking lots. When other parking lot sweepers are too large, and small outdoor ride-on or walk-behind sweepers have proven inefficient, time-consuming and maintenance intensive, the Model 210 is your sweeper. **Numerous features of this amazing unit:**

**Hopper:** powerful piggyback hopper dump cylinders lift the hopper up to 60 inches for dumping into dumpsters or containers located near parking lots or garages.

**Gutter Broom:** 32" diameter gutter broom option removes debris from around parking lot islands, medians and parking bumpers.

**Dust Control System:** the only single engine parking lot sweeper on the market with a high-efficiency centrifugal dust separator for maximum fine dust particulate separation which provides excellent dust control while using less water.

**Blower Wheel:** utilizes a super-efficient aluminum alloy blower that is self-cleaning and reduces fuel consumption because of its lightweight design requiring less horsepower. **The blower is designed to work with the TYMCO Regenerative Air System to both push and pull air which delivers even greater sweeping performance.**

**Model 210 Pick-up Head:**

incorporates full-width air blast and suction and is designed to work effortlessly with the **TYMCO Regenerative Air System** to pick up a wide variety of parking lot debris from leaves and trash to heavy dirt, sand and rocks.
